OPEN SOURCE

Blinter - Windows Batch File Linter

AUTHOR

Author project · Integrated by CodeRabbit · ★ 40+ stars · Python

github.com/tboy1337/Blinter

docs.coderabbit.ai/tools/blinter

Static analysis for batch files: syntax, security, performance and style checks for batch scripting. Integrated into CodeRabbit for automatic PR review of Windows batch scripts.

pytest-postgresql

CONTRIBUTOR

Merged · PRs #1295, #1182 · May–Jul 2026 · ★ 500+ stars · Python

github.com/dbfixtures/pytest-postgresql/pull/1295

github.com/dbfixtures/pytest-postgresql/pull/1182

Contributed to a widely used Python library for testing PostgreSQL integrations. Added support for modern asynchronous applications and made the toolkit fully usable on Windows, including automated testing and CI.

Bitcoin Core

CONTRIBUTOR

Merged · PR #34219 · Mar 2026 · C++

github.com/bitcoin/bitcoin/pull/34219

PSBT MuSig2 validation for pubnonce and partial-signature deserialization. Merged to Bitcoin Core master (milestone 31.0); ACKs from core reviewers.

PROFESSIONAL SUMMARY

Self-taught software developer and IT professional with experience spanning infrastructure, automation and open-source software.

Contributor to Bitcoin Core and pytest-postgresql (async fixtures and Windows support), with a track record of delivering production-ready solutions that improve operational efficiency. Skilled at bridging technical and business requirements while leveraging modern AI-assisted development workflows – prompt engineering, agent harnesses and tooling such as Cursor and Claude Code.

EDUCATION

HND Computer Forensics

University of Glamorgan

2008 – 2010

Merit – digital forensics, network security, investigation

BTEC National Diploma (IT)

Crosskeys College

2005 – 2007

Merit – systems, software development, networking, support

10 GCSEs (A–C)

Pontllanfraith Comprehensive

1999 – 2004

Including Mathematics and English

PROFESSIONAL EXPERIENCE

IT / Hotel Manager

Sergeants Accommodation

January 2022 – March 2026

- › Researched, implemented and maintained end-to-end IT infrastructure including networks, workstations, backups and IT security for a small hotel
- › Researched, implemented and maintained booking and channel-management automation that reduced manual processing by **70%**, improving operational efficiency and reducing booking administration
- › Researched, implemented and maintained a Ubiquiti networking environment supporting day-to-day business operations and guest services
- › Managed the business as an IT and General Manager, overseeing devices, networking, hotel operations and guest services

Customer Service Technician

Royal College of Nursing

July 2021 – December 2021

- › Delivered a bespoke IT project directly for the Head of IT, managing implementation, documentation and cross-department rollout
- › Administered Active Directory environments and produced technical documentation to support adoption and ongoing maintenance

Technical Vetting Call Engineer

Vista Retail Support

Aug 2019 – Jul 2021

- › Provided 2nd-line technical support for retail and hospitality environments, resolving complex incidents and minimizing downtime
- › Acted as an escalation point for critical POS outages, coordinating troubleshooting and restoration activities
- › Produced and maintained technical documentation to improve support consistency and knowledge transfer

Assistant Manager / IT Support

Surf The Shop · Sep 2018 – Jul 2019

- › Managed multi-channel e-commerce operations across eBay, Amazon and Etsy while maintaining warehouse IT systems and inventory workflows
- › Supervised staff and coordinated fulfilment processes, balancing operational targets with day-to-day technical support

Cryptocurrency Mining Farm Owner/Operator

Self-Employed · Apr 2017 – Mar 2019

- › Researched, built and operated cryptocurrency mining infrastructure with remote monitoring, uptime management and hardware maintenance
- › Tuned firmware and configurations to maximize performance, power efficiency and operational ROI
- › Managed ASIC, GPU, CPU and FPGA hardware
- › Created custom power cables and connectors

Helpdesk Support

BBC Store Online Support · Dec 2015 – Apr 2017

- › Provided launch-period customer support during BBC Store rollout, handling high-volume inquiries via Salesforce CRM
- › Reproduced cross-platform defects and escalated actionable bug reports to engineering teams

SELECTED PROJECTS

WindowsRescue

AUTHOR

Author project · ★ 25 stars · Batch

github.com/tboy1337/WindowsRescue

Collection of batch scripts to repair, maintain, optimize and update Windows systems – deployment-friendly tooling for admins and power users.

PyRefactor

AUTHOR

Author project · Python · AST analysis

github.com/tboy1337/PyRefactor

Refactoring and optimization linter using AST analysis to flag performance issues, complexity hotspots and actionable code improvements.

run-bitcoin-tests

AUTHOR

Author project · ★ 6 stars · Python · Docker

github.com/tboy1337/run-bitcoin-tests

Docker-based workflow to run Bitcoin Core C++ unit tests and Python functional tests with flexible configuration – supports local validation before contributing upstream.

MediaRelay

AUTHOR

Author project · Python

github.com/tboy1337/MediaRelay

Secure video streaming server for sharing a personal media library over the internet, with monitoring and performance-focused design.

PR2MD - Pull Request to Markdown

AUTHOR

Author project · Python · CLI

github.com/tboy1337/PR2MD

Command-line tool that extracts GitHub pull request and issue data into well-structured Markdown for documentation, archiving and review workflows.

Git-Manager-Windows

AUTHOR

Author project · ★ 6 stars · Batch

github.com/tboy1337/Git-Manager-Windows

Batch automation for downloading, installing, uninstalling and updating Git on Windows – repeatable setup across workstations and VMs.

ProfitPioneer

AUTHOR

Author project · Python · Streamlit

github.com/tboy1337/ProfitPioneer

Streamlit e-commerce analytics dashboard with real-time visualisation, reporting and operational metrics for online sellers.
